Innovative, efficient, sturdy and reliable.

Business.LiNE from FESSMANN is the perfect solution to manufacturing premium, top quality hot-smoking products. The smokehouse is equipped with the TURBOMAT ventilation system – tried and tested worldwide – and that means it is specialised for the hot-smoking process. It guarantees premium, repeatable products with consistent taste and colour. With Business.LiNE, you get top reliability and extraordinary performance for an extremely attractive price.

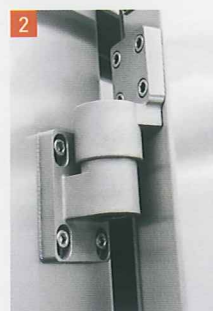

With Business.LiNE, you can dry, smoke and cook with minimal weight loss and the highest efficiency level. Thanks to PU insulation and frequency-controlled, energy-efficient fan technology, you not only produce quickly and reliably, but with top energy efficiency as well.

FESSMANN smokehouses with the TURBOMAT ventilation system are 100% 'Made in Germany'. First-class components and top production techniques – such as the steam-tight welded plant housing – guarantee that your machine has a very long service life. After all, these have been the top-selling smokehouses for over 40 years for a good reason!

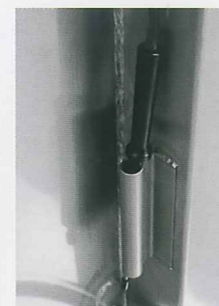

Business.LiNE smokehouses have EasyCONNECT technology inside, which means quick installation and commissioning. The contactor box is easily accessible and located above the machine. The electrical wiring is shipped ready to connect – much of the work is already done in the factory. This saves valuable time during installation and makes maintenance so easy that you can even perform it yourself.

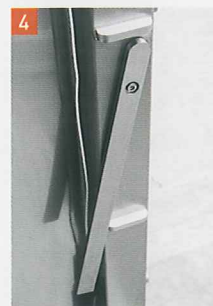

The ventilation system follows the proven TURBOMAT principle of fan, heat source and product in close proximity – for multiple trolley systems as well.

Solid construction. The stable lifting hinge makes operators' work easier and extends the service life of the system's door seal by years.

High-quality components: the core and chamber temperatures are measured with the proven PT 100 sensor from FESSMANN.

Well-designed safety concept: emergency opener in industrial design.

Clever solution: Integrated doorstopper as a standard feature.

Service-compatible arrangement: the contactor box is directly on top of the machine. Ready-to-connect components mean quick, easy maintenance.

The flexible cleaning concept allows convenient connection to the existing cleaning system. The smokehouse can be supplied with an optional foam cleaning system as required.

Door lock made of stainless steel. Doors are sealed when closed, thanks to 4-point technology.

The intuitive FLC100 touch control system is integrated into the machine's door.

Handy and perfectly designed: the stainless steel variant of the FESSMANN door handle.

Anti-slip machine floor and rails in round hygiene design.

Flexible concept: the hygiene siphon is integrated into the machine.

THE ADVANTAGES

THE Business.LiNE AT A GLANCE.

100 % quality

By means of the best materials, modern technology, careful assembly and profound know-how.

COMPETITIVE EDGE WITH PATENTED TECHNOLOGY.

Patents are inside every FESSMANN machine. They make our smokers unique.

EXPERIENCE GAINED FROM

20.000 SMOKERS.

Take advantage of the know-how we have obtained in 90 years of experience. Everyone who has built and sold as many smokers as we have knows which factors are important.

GET MORE FOR YOUR MONEY!

With our smoking technology, you can smoke faster and lose less weight.

LESS MAINTENANCE

We engineer and build our machines with great care so that you perform less maintenance.

SIMPLE CONTROLS

Our intuitive control panel is located in the door for easy access. It offers many pre-programmed processes for convenient operation.

WORLD WIDE!

We are close to our customers around the globe – with motivated, qualified employees and service partners.

MMMM... That's delicious! FESSMANN smoking quality.

Because your customers are interested in taste. We don't compromise on that point.

SPARE PART GUARANTEE

For each of our machines, we guarantee you complete spare part availability for the entire service life.

MADE IN GERMANY

THE LABEL SAYS IT ALL!

The FESSMANN smokehouses are designed and built in Germany with the best materials.

Our frame construction allows us to use thinner sheets, so the heat stays in the smokehouse and not in the environment.

MINUS 20%

Lower costs through higher productivity.

Shorter smoking times, less maintenance, less energy loss and more taste. With a FESSMANN machine, you produce more effectively – and therefore your costs are lower.

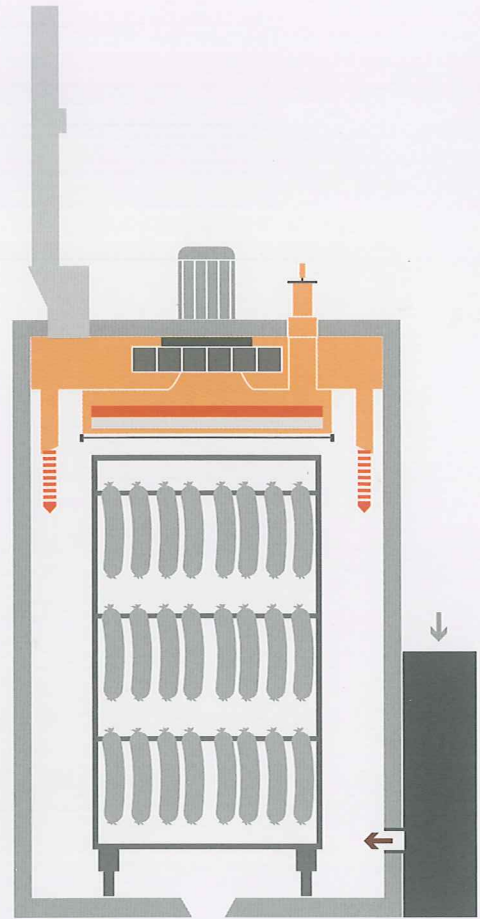

Quicker installation, quick delivery and quick service!

Perfect construction and pre-configuration ensure quick and easy installation.

Intense taste.

The Business.LiNE smoke generators **RZ325** and **RZ550** provide intense smoke in short, repeatable smoke cycles. The Business.LiNE smoke generators create top smoke concentration levels with first-class, consistent smoke colour and taste quality from the very beginning. This raises productivity and saves production time. Your smoked products possess a unique, appetising sheen.

- Low operating costs, economical consumption of smoking materials.
- Fill level monitoring for top process reliability.
- Proven safety concept from FESSMANN for accident prevention.

FESSMANN
SAFETY CONCEPT

Intuitive controllers.

In just a few easy steps, the smokehouse is ready for use. The entire system is engineered for simple, intuitive operation. You have the operation and control of all processes at your fingertips with the **FLC100** touch control system integrated into the chamber doors.

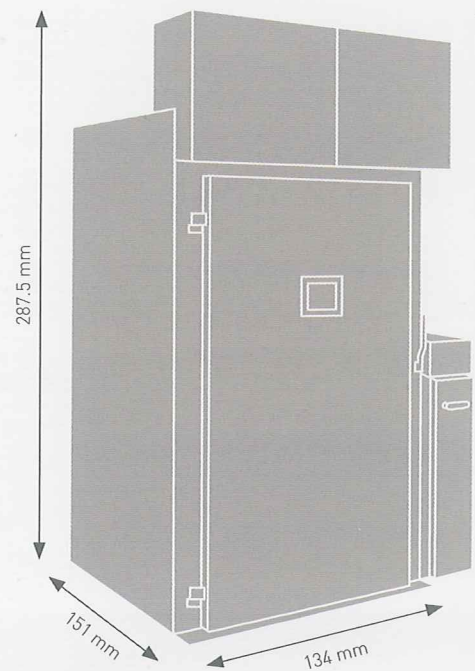

- Simple, user-friendly control of all system parameters.
- FESSMANN base numbers integrated.
- Easy operation with the intuitive, clear and ergonomically operated program.
- Touchscreen integrated into front doors.
- Intuitive navigation.
- Connection to document software.

Values that create trust.

With its minimal weight losses during production and short process cycles, the new FESSMANN Business.LiNE guarantees you low maintenance, operation and procurement costs. This smoke-house pays after only a short time. As your production volume grows, your Business.LiNE can grow with it, thanks to its modular construction.
